

Vegetable

Hong Fang Ni

Lettuce F1

Crop	Lettuce
Crop type	Babyleaf
Growing Method	Open field
Colour	Dark red
Plant type	Red Oakleaf
Organic	Yes

Hong Fen

Lettuce F1

Crop	Lettuce
Crop type	Eazyleaf
Growing Method	Open field

Hong Bei Ni

Lettuce F1

Crop	Lettuce
Crop type	Babyleaf
Resistance IR	LMV:1
Growing Method	Open field
Colour	Dark red
Plant type	Red Lollo Rosso

Hong Yang

Lettuce F1

Crop	Lettuce
Crop type	Mini-Romaine
Resistance IR	LMV:1
Cultivation	Red mini romaine, Fresh market
Planting Periods	Entire Season
Growing Method	Open field
Size	16 - 20 cm
Colour	Dark red
Organic	Yes

Zi Yu Zhu

Lettuce F1

Crop	Lettuce
Crop type	Babyleaf
Planting Periods	Entire Season
Growing Method	Open field
Size	Compact - Medium
Colour	Dark red
Plant type	Red Romaine
Organic	No

Zi Luo Lan

Lettuce F1

Crop	Lettuce
Crop type	Lollo Rosso
Resistance IR	Fol:1
Cultivation	Lollo Rosso, Fresh market and processing
Planting Periods	Entire Season
Growing Method	Open field
Size	Medium
Colour	Red
Suited for	Fresh cut, Processing

Bao Luo

Lettuce F1

Crop	Lettuce
Crop type	Iceberg
Growing Period	Spring, early summer, autumn
Growing Method	Open field
Colour	Green
Organic	No

Zuo Luo

Lettuce F1

Crop	Lettuce
Crop type	Iceberg
Growing Period	Spring, summer, autumn
Growing Method	Open field
Colour	Dark green

Vegetable

Qin Yun

Lettuce F1

Crop	Lettuce
Crop type	Romaine
Resistance IR	LMV:1
Planting Periods	Entire season
Growing Method	Open field
Size	30 - 32cm
Colour	Dark green

Qin Tian

Lettuce F1

Crop	Lettuce
Crop type	Romaine
E-number	E01G.6678
Growing Method	Open field
Colour	Dark green

Jin Ping Da Su Sheng

Lettuce F1

Crop	Lettuce
Crop type	Crispy
Resistance IR	LMV:1
Planting Periods	Entire Season
Growing Method	Greenhouse
Size	Medium
Colour	Green

Bing Shan

Lettuce F1

Crop	Lettuce
Crop type	Little Gem
Resistance IR	LMV:1
Growing Method	Open field
Colour	Medium dark green

Xing Fu

Lettuce F1

Crop	Lettuce
Crop type	Curly
Subtype	Short Day
Planting Periods	Autumn - Winter
Growing Method	Greenhouse
Colour	Green

Man Tian

Lettuce F1

Crop	Lettuce
Crop type	Butterhead
Subtype	Long Day
Growing Method	Greenhouse
Size	Compact
Colour	Green

Lv Fang Ni

Lettuce F1

Crop	Lettuce
Crop type	Babyleaf
Resistance IR	LMV:1
Growing Method	Open field
Colour	Dark green
Plant type	Green Oakleaf
Organic	Yes

Lv Luo Sha

Lettuce F1

Crop	Lettuce
Crop type	Lollo Bionda
Resistance IR	LMV:1/Fol:1
Cultivation	Lollo Bionda, Fresh market and processing
Growing Method	Open field
Size	Medium
Colour	Light green
Suited for	Fresh cut, Processing

Huang Zuan NO:1 Stock F1

- 1.Cucubita moschata hybrid used exclusively for cucumber.
- 2.Excellent graft compatibility, well increasing plant vigor.
- 3.Wild adaptability. Spread widely variety.
- 4.Diseases Resistance: F

Huang Zuan NO:2 Stock F1

- 1.Cucubita moschata hybrid used exclusively for cucumber.
- 2.Excellent graft compatibility, well increasing plant vigor.
- 3.Increase disease resistance but keep cucumber taste
- 4.Diseases Resistance: F

Fan Zuan no:1 Stock F1

- 1.The first generation of tomato is mating with tomato, and the grafting stock is tomato.
- 2.It has strong growth potential, strong root system, low temperature resistance, high temperature resistance, strong affinity, and high resistance to root knot nematodes.
- 3.Diseases Resistance: BWT; F-1.2; FCRR; V; IV; TOMV

Fan Zuan no:2 Stock F1

- 1.Wide hybridization with wild tomato, and the grafting stock is tomato.
- 2.It has strong growth potential, strong root system, low temperature resistance, high temperature resistance, strong affinity, and high resistance to root knot nematodes.
- 3.Increase resistance of tomato bacterial wilt.
- 4.Diseases Resistance: BWT; F-1.2; FCRR; V; IV; TOMV; TY; CR.

Qin Zhen NO:1

Stock F1

- 1.The new grafting pumpkin type. Small seeds. Hybrid, using for watermelon grafting.
- 2.Making watermelon root strong increase watermelon vigorous growth, resistance and high yield but keep watermelon good taste.
- 3.Diseases Resistance: F

Qin Zhen NO:2

Stock F1

- 1.The new grafting pumpkin type. Big seeds. Hybrid, using for watermelon grafting.
- 2.Making watermelon root strong increase watermelon vigorous growth, resistance and high yield but keep watermelon good taste.
- 3.Diseases Resistance: F

Tian Zuan NO:1

Stock F1

- 1.The new grafting squash type. Hybrid, using for Muskmelon grafting.
- 2.Thin skinned muskmelon root strong increase muskmelon vigorous growth, resistance and high yield but keep muskmelon good taste.
- 3.Wild adaptability. Spread widely variety.
- 4.Diseases Resistance: F

Tian Zuan NO:2

Stock F1

- 1.The new grafting squash type. Hybrid, using for Muskmelon grafting.
- 2.Making muskmelon root strong increase muskmelon vigorous growth, resistance and high yield but keep muskmelon good taste. Wild adaptability.
- 3.Diseases Resistance: F
